THE PRODUCT

A phone call without a language barrier

Brickline Web World Phone Service is a web app that places real international phone calls to any phone number and interprets the conversation live, in both directions. Choose your language and the other person's language, enter the number and tap Call. You speak your language, they hear theirs, and their answer comes back to you in yours.

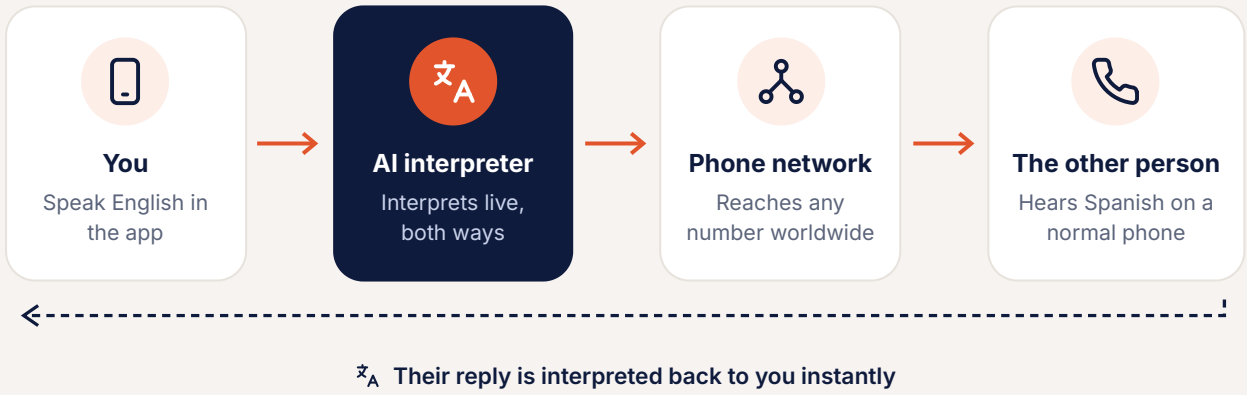

Open in any browser
On any phone, tablet or computer. Nothing to download.

Install as an app icon
Add it to your home screen in one tap. Native iOS and Android apps are coming.

Real phone network
Calls go to ordinary landlines and mobiles. The other person needs no app and no internet.

AI agent mode
Let the AI assistant speak on your behalf and handle a call for you.

How a call works

Four steps

1 **Choose languages**
Yours and theirs.

2 **Enter the number**
Any landline or mobile.

3 **Tap Call**
See the price before you call.

4 **Just talk**
Interpretation runs live.

FEATURES

Everything you need, nothing you don't

Clear, complete menu

Call, Recent, Languages, Balance and Top-up, Settings, Accessibility, Help and Legal: all one tap away.

Speaks your language

The interface opens in your language automatically: English, Spanish, French, German, Portuguese, Russian, Ukrainian, Chinese, Japanese, Arabic, Hebrew, Hindi, with more coming.

Exact live usage meter

During a call you see the time, amount spent, remaining balance and minutes left. A full history of calls and top-ups is always available.

One-tap top-up

Top up with Apple Pay, Google Pay or a bank card. Optional auto-refill with a spending cap you set.

Fast, secure sign-in

Sign in with Face ID or a fingerprint. No passwords to remember.

Local caller ID

In many countries the person you call sees a local number and can call you back. Rolling out country by country.

Private by design

Calls are not recorded and no transcripts are stored.

Clear and lawful

The other party hears a short notice that an AI interpreter is on the call and is asked for consent.

Accessible to everyone

Built to WCAG 2.1 AA, with an accessibility menu, screen reader and keyboard support.

Honest pricing

Transparent per-country pricing, shown before each call. If a mobile destination costs more, we explain why.

VALUE ON THE WORLD MARKET

Live interpretation on phone calls usually costs a lot. It doesn't have to.

Until now, interpreted phone calls meant paying a human interpreter by the minute, or using an AI app with high per-minute rates, or owning a specific brand of phone. World Phone Service is designed to be among the most affordable phone calls with live interpretation, from any phone or browser, to any number.

Solution	Type	Publicly listed rate*
Human phone interpreters (e.g. LanguageLine)	Human interpreter service	about $3.95 / min
Wordly	AI interpretation for meetings and events	about $1.25–2.50 / min
MayaHelp	AI call translation	about $1.49 / min
Call2Me	AI call translation app	about $0.25–0.33 / min
TalkTool	AI call translation app	about $0.30 / min
Built-in translators (Samsung, Pixel, Apple)	On-device feature	Only on their own supported devices
Brickline Web World Phone Service	Real calls + live AI interpretation	**From a few cents per minute**

* Publicly listed rates, Nov 2026, may change. Shown for general comparison only; names and trademarks belong to their owners. Brickline pricing is transparent per country and shown before each call.

Why clients choose us

Among the most affordable
Live-interpreted calls from a few cents per minute, with the exact price shown before you call.

Any phone, any browser
No specific device or brand required. Works on iPhone, Android, Windows, Mac and more.

All major languages
Two-way interpretation between the languages you and your contacts actually speak.

Real network, any number
Landlines and mobiles worldwide. The other person needs nothing.

Local numbers
Local caller ID in many countries, so people recognise and return your call.

Accessible to everyone
WCAG 2.1 AA design for seniors and people with hearing or speech needs.

WHO IT'S FOR

Made for real conversations

Families abroad

Talk with relatives who speak another language, including grandparents on a home landline.

Immigrants and newcomers

Call doctors, banks, landlords and government offices with confidence.

Travelers

Book a hotel, a taxi or a table, or sort out a problem in a country whose language you don't speak.

Small businesses

Call suppliers, partners and customers worldwide without hiring an interpreter.

Seniors

Large text, high contrast and a simple flow: one number, one button.

Hearing and speech needs

Accessibility tools and the AI agent mode help more people make phone calls on their own terms.

Privacy, compliance and accessibility

Privacy

Calls are not recorded. No transcripts are stored.

Transparency

The other party hears an AI-interpreter disclosure and consent notice, in line with EU AI Act transparency.

Regional compliance

Designed to follow privacy and accessibility laws by region, including GDPR and applicable US laws.

Accessibility

WCAG 2.1 AA. Accessibility menu: text size, contrast, stop animations, readable font. Screen reader and keyboard support.

LEGAL NOTICE

World Phone Service is provided by Brickline Web and is currently in a test / early access phase. Features, supported languages, local caller ID availability and prices vary by country and may change without notice. Prices are shown in the app before each call. AI interpretation is automated and may contain errors; it is not a substitute for a certified interpreter in medical, legal or other critical situations. The service is not intended for emergency calls; always dial your local emergency number directly. The other party is informed that an AI interpreter is used and is asked for consent. Calls are not recorded and transcripts are not stored. Competitor figures are publicly listed rates as of November 2026, provided for general comparison only, and may change; all trademarks belong to their respective owners. This brochure is for information only and is not an offer or a contract.
